

GS TAITAN Diesel Development Status Note

Publication control note

This note keeps the public document layer accurate while the diesel flagship route remains under final development.

Field	Value
Current sales release	Gasoline only
Diesel flagship status	Under final development
Public quotation route	Not open as released product
Machine manual release	Not published as final diesel machine manual
Website handling	Status note only / update request path
Internal handling	Prepare after final engine and machine configuration are confirmed

Notes

- This file is a publication-control note rather than a machine manual.
- Do not place this note inside shipment packs for released gasoline machines.
