

# GST-1000 vs GS TAITAN-1000 | Compare Sheet

A buyer-facing comparison between the core standard 1000 mm tracked flail mower and the flagship 1000 mm route.

Use this compare sheet together with the live compare page when the buyer is deciding whether the standard route is enough or the project already calls for a flagship step-up.

## How to use this compare sheet

- Choose GST-1000 when the buyer wants the main standard-family balance point and flexible engine-path discussion without moving into full flagship equipment.
- Choose GS TAITAN-1000 when the project needs a stronger premium route, industrial remote standard, hydraulic lift standard, and the flagship gasoline platform.

## Side-by-side comparison

Comparison point	GST-1000	GS TAITAN-1000
Route in lineup	Core standard 1000 mm tracked flail mower	Flagship 1000 mm tracked flail mower
Current public route	Gasoline / diesel available	Gasoline available now; diesel under final development
Gasoline engine route	Loncin 459 / LC192F gasoline route	Loncin 2V80 V-twin gasoline route
Control layer	C7 standard, industrial remote optional	Industrial remote standard
Lift system	Manual standard, hydraulic remote optional	Hydraulic lift standard
Best fit	Broader routine vegetation control in the standard family	Premium contractor route for denser vegetation a
